

### **Assignment of an AVV<sup>1</sup> entry if two chapters of the AVV are to be considered**

Non-hazardous waste wood may be assigned to different entries of the AVV. In practice waste wood from different origins often has been mixed. The result of this is, that this mixtures may be assigned to entry **17 02 01** (wood) as well as to **20 01 38** (wood other than that mentioned in **20 01 37**).

The AVV entry **17 02 01** stresses that the waste was generated by construction and demolition works, entry **20 01 38** points out that the waste wood originates from the municipal sector.

#### **Note:**

The common practice of mixing waste wood from different origins is in accordance with the German Waste Wood Regulation, which gives distinctions on categories of waste wood (A I to A IV).

---

<sup>1</sup> Abbr. for "Abfallverzeichnis-Verordnung", translated: German Waste Catalogue Ordinance. Entries and designations of the AVV comply with those of the European list of wastes (Decision 2000/532/EC)
