

### **Assignment of an AVV<sup>1</sup> entry if two chapters of the AVV are to be considered**

The aluminium scrap as shown may be assigned to entry 15 01 04 (metallic packaging) as well as to 19 12 03 (non-ferrous metal).

In one case the high proportion of packaging is taken into account for the assignment. The other case underlines that the waste originates from the mechanical treatment of waste (e. g. sorting, crushing, compacting, pelleting).

---

<sup>1</sup> Abbr. for "Abfallverzeichnis-Verordnung", translated: German Waste Catalogue Ordinance. Entries and designations of the AVV comply with those of the European list of wastes (Decision 2000/532/EC)
