

## **Assignment to an AVV<sup>1</sup> entry according to the residual content of oil**

There may remain 30g to 50 g compressor oil after removal of the cooling agent from compressors of cooling appliances.

Compressor oil of older cooling equipment may contain CFC (chlorofluorocarbons).

If as much compressor oil remains in compressors, that they are not drip-free, they should be assigned to the AVV entry **16 02 15\*** (Hazardous components removed from discarded equipment).

---

<sup>1</sup> Abbr. for „Abfallverzeichnis-Verordnung“, translated: German Waste Catalogue Ordinance. Entries and designations of the AVV comply with those of the European list of wastes (Decision 2000/532/EC).
