

### **Assignment of an AVV<sup>1</sup> entry within the appropriate group of the AVV**

Due to their origin rubber waste should be assigned to the group **07 02** (Wastes from the MFSU of plastics, synthetic rubber and man-made fibres) of chapter **07** (Wastes from organic chemical processes) of the AVV. But within this group there is no entry mentioning the term rubber.

However, in the chemistry encyclopedia Römpp it is available, that rubbers and chemical fibres also belong to plastics. Taking this into account, it is possible to classify rubber waste to entry **07 02 13** (waste plastic) of the AVV.

---

<sup>1</sup> Abbr. for "Abfallverzeichnis-Verordnung", translated: German Waste Catalogue Ordinance. Entries and designations of the AVV comply with those of the European list of wastes (Decision 2000/532/EC)
